

## Summer Course

### Week 3 Assignment (Due:5:00 pm August 11, 2017)

**(Caution: No delay this time!!)**

**(From this week, you are required to update your code everyday no matter how much you have done)**

#### **1. Front End Polishing (For Fang Peng)**

According to the feedback from last week's static web design, you should revise and polish the two webpages. **Self-responsiveness is required!!**

After you hand in the login and insert page, we will give feedback. And you should revise them again to hand in a final version.

#### **2. Back End Design (For Huang Xiaohu & Hua Kang)**

You should design the back-end PHP code according to the demand report and finished the following function:

1. Login
2. Logout
3. Insert
4. Export

#### **Schedule:**

##### **1.Front End**

Deadline	Work
5:00 pm on August 6	Finish the login page
5:00 pm on August 9	Finish the insert page
5:00 pm on August 11	Hand in the final design

##### **2.Back End**

Deadline	Work
5:00 pm on August 6	Login and logout function
5:00 pm on August 9	Insert function
5:00 pm on August 11	Export function

(About the login function, you should use RVPN to contact with API in school to achieve it)
